

Five Steps for Personalized Learning through funtoot

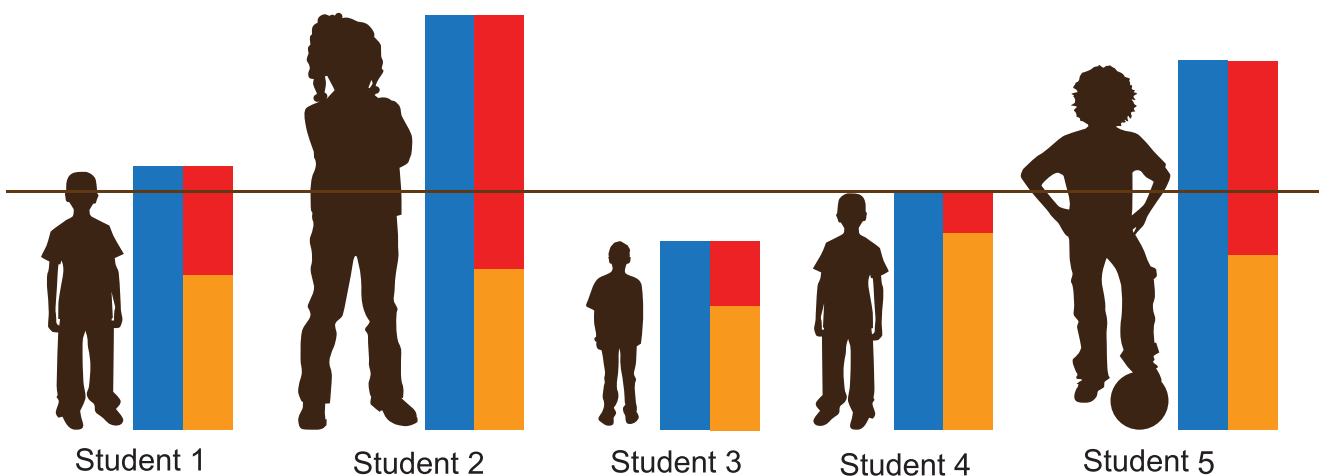

The current scenario

In the current education system, teachers are left with little choice but to adopt homogeneous teaching methods. Due to lack of time, they can only teach at one level to the entire class – irrespective of each student's inherent potential, strengths and weaknesses.

However, students come with varying degrees of potential and are usually at different stages of learning. Moreover each student responds to a different style of teaching and does not absorb 100% of the lesson, thereby resulting in a learning gap.

Our surveys have consistently shown that personalized education helps reduce the learning deficit.

The funtoot program has resulted in a 25% increase in Learning Engagement & a 65% increase in Attention Span for students across schools using this program.

Homogeneous Learning Impacted by Teacher

Inherent Potential **Learning Received by Students** **Learning Deficit**

Learning gap is the difference between the child's potential and what the child has actually absorbed due to homogeneous teaching methodology.

funtoot has helped me overcome Maths learning gaps in a fun and interactive way.

- Ved, Grade 6 Student, KLE Society School, Nagarbhavi.

What is funtoot?

Every child is unique & so are their learning needs. funtoot is their new personalized learning coach for curricular Maths & Science.

funtoot is an intelligent, adaptive learning solution based on Artificial Intelligence (AI) that facilitates personalized learning based on each child's individual IQ, learning style, learning gaps and proficiency. It also makes learning fun by leveraging the student's area of interest and helps students overcome learning gaps.

100,000+ students across schools in India are benefiting from our unique approach combining advances in computing technology, cognitive psychology and pedagogy to create higher learning achievements in every child.

funtoot creates a personalized learning path for every child

constantly adapting to their needs and progress

Learn Anytime, Anywhere with student friendly interface

Topics & subtopics mapped as per CBSE/ ICSE syllabus

Step by Step Analysis

Hints & Micro tutorials for assistance

Video tutorials for 9th grade students

Set revisions during exam time

Get instant/weekly reports on performance

Score fundaas for correct answers & receive certificate on course completion.

The funtoot Effect

The following is the qualitative feedback that we have received from schools:

- Provides immediate assistance when a student faces a problem
- Personalizes learning path for each individual student
- Enables self-learning for students beyond school
- Provides immediate detailed reports and analysis for teachers

Our surveys show that funtoot positively impacts student learning as shown below:

funtoot is Unique:

- It evaluates students step by step and not only by the end result
- A student can take multiple paths to reach a solution
- It identifies the exact error in any step of the problem (highlighted in red below)
- The child gets to know his/her mistake instantly

Student 1

$$3x-2 = x+2-2x$$

$$-2+2 = x-2x-3x$$

$$0 = 4x$$

$$x=0$$

Student 2

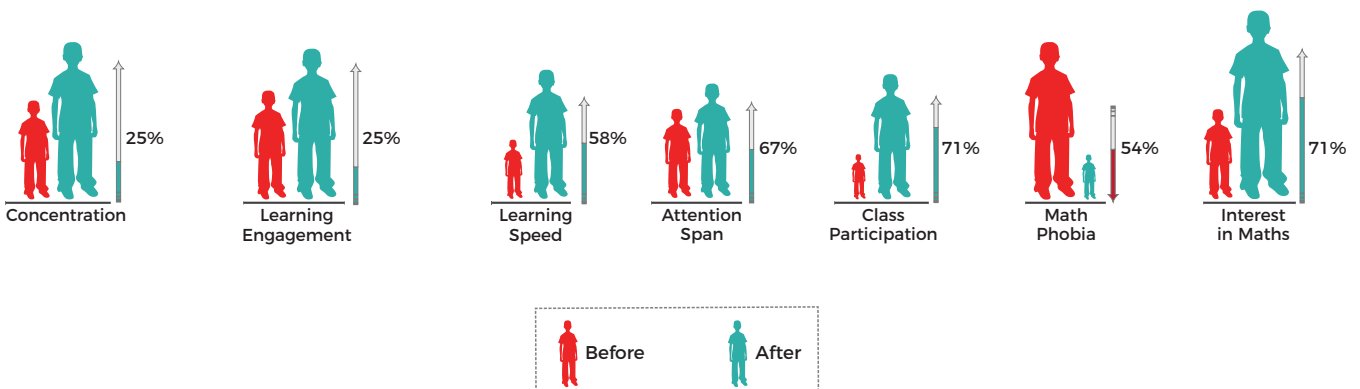

$$3x-2 = x+2-2x$$

$$3x+x-2x = 2+2$$

$$4x-2x = 4$$

$$4x = 4$$

$$x=1$$

funtoot Usage & Impact

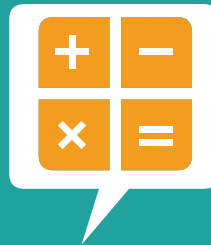

Thousands of students have used funtoot during past many academic sessions to improve their learning efficiency and increase their accuracy in solving problems.

135+
Schools

>100000
students

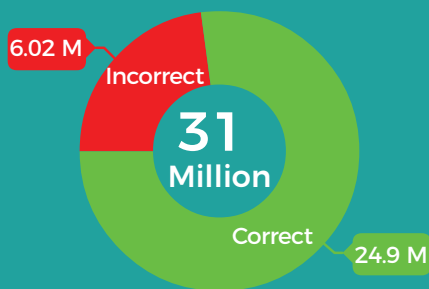

~ 31 Million
problems
attempted

3.2 Billion
Minutes
used

As per our recent customer survey we have found that:

Problems attempted & solved

Increased usage of funtoot leads to increased accuracy

Benefits of funtoot

Reduces Maths Phobia

Improves score in Maths and Science

Increases child's interest in the subject

Identifies and Resolves child specific learning gaps

Assists teachers and parents to provide focused attention to child.

Step by step assistance

Improves concentration

Cost effective
